**ACCELOPS NAMED 2010 HOT COMPANIES FINALIST BY
NETWORK PRODUCTS GUIDE**

SANTA CLARA, CALIF. – February 10, 2010 – [AccelOps](#), the integrated datacenter and cloud service management leader, today announced that it has been named a 2010 Hot Companies finalist by *Network Products Guide*. Selected from a global industry analysis of information technology vendors, which included established large companies, mid-size and new start-ups around the world, AccelOps has advanced to the finalists stage based on the "4Ps" selection criteria—namely Products, People, Performance, and Potential.

The coveted 2010 Hot Companies analysis encompasses companies in all areas of information technologies including security, wireless, storage, networking, software and communications. Companies that are honored with the award distinction serve to raise the bar higher for their competitors, to drive higher customer satisfaction, and to strive to maintain the distinction each year.

The Hot Companies 2010 evaluation process also assessed candidates for entrepreneurial spirit, seasoned executives with relevant experience, a clear understanding of the segment of the IT market in which they are active, products and solutions that are positioned to take advantage of the emerging market opportunities, a well developed revenue-growth model, and a clearly planned expansion strategy.

"We are delighted that our company has reached the 2010 Hot Company Finalist stage," said [Imin Lee](#), CEO of AccelOps. "This further validates our position as a company poised to successfully overcome the network monitoring and business service management issues faced by organizations today as they implement virtualization, web application and cloud technologies."

The 2010 Hot Companies winners will be announced and honored at the Technosium 2010 Presentations and Dinner at the Palace Hotel in San Francisco on March 18, 2010. For

more information about the event and for a complete list of finalists, please visit www.technosium.com.

As industry's leading technology research and advisory publication, Network Products Guide plays a vital role in keeping decision makers and end-users informed of the choices they can make in all areas of information technology. You will discover a wealth of information and tools in this guide including the best products and services, roadmaps, industry directions, technology advancements and independent product evaluations that facilitate in making the most pertinent technology decisions impacting business and personal goals. The guide follows conscientious research methodologies developed and enhanced by industry experts. To learn more, visit www.networkproductsguide.com.

About AccelOps, How IT Accelerates Business

AccelOps provides award-winning datacenter and cloud service management software delivered as a virtual appliance or SaaS. The all-in-one solution monitors datacenter, network infrastructure and cloud environments across service, performance, availability, security and change management. The integrated approach aggregates, cross-correlates and manages diverse operational data, both on-premise and in the cloud, to yield end-to-end visibility, efficient root-cause analysis, reduced MTTR, operational efficiency and compliance automation. The Silicon Valley-based company is privately held, venture-backed and led by experienced technology executives who created the popular Cisco MARS security information management appliance. Do more, control more and save more by visiting www.accelops.net.
