

AccelOps, Inc. is an early high-tech startup, specializing in providing end-to-end network, application and security infrastructure monitoring solutions to enterprises. The founders and key members of the company are serial entrepreneurs who have been successful in building startups and have successful track records such as the acquisition of their past startup company by Cisco Systems in 2005. Currently, AccelOps is looking for a mid-level Software Engineer who has the following qualifications:

- BS/MS in Computer Science or Electrical Engineering with 3-5 years of work experience
- Strong C/C++ programming experience
- Development experience on Linux/Unix platform and STL library
- Strong problem solving skills
- Knowledge of database (Oracle/SQL Server/MySQL) and TCP/IP programming is a plus
- Team-oriented, fast learner, self-motivated and good communication skills to work in a fast paced startup environment

Interested party should submit your resume to careers@accelops.net
