

AccelOps, Inc. is a venture backed innovative company, specializing in Datacenter / IT Service Management Software and SaaS. Datacenter/IT management market is a \$11B market as of 2008 and is experiencing explosive growth currently and in the future years.

AccelOps is based in Silicon Valley and with office in China. The founders and key members of the company are serial entrepreneurs with successful track records building startups and acquisitions by Cisco Systems, and HP/Opware with high multiples in valuations.

AccelOps is experiencing rapid growth due to market demands. We are currently hiring in both the Silicon Valley office and in Shanghai, China office.

We are looking for a UI developer in our Silicon Valley office, with the following desired qualifications:

- BS/MS in Computer Science or Electrical Engineering with 3-8 years of work experience
- Strong GUI programming in experience Java Swing and/or Adobe Flex. Flex experience is highly desirable, but not required
- Reasonable experience in integrating front end code with Application server and databases
- Strong problem solving skills
- Working knowledge of database (Oracle/SQL Server/MySQL) and TCP/IP programming is a plus
- Team-oriented, fast learner, self-motivated and good communication skills to work in a fast paced startup environment
- Ability to work independently to achieve goals, ability to multitask, perform under pressure, and meet deadlines

The candidate should be responsible, self-initiative, hardworking, and willing to join the start-up at a ground level opportunity. Email your cover letter and resume to careers@accelops.net
