ACCELOPS ANNOUNCES FREE TRIAL DOWNLOAD OF ITS AWARD-WINNING DATA CENTER AND CLOUD MONITORING SOLUTION

Enterprises and Service Providers Invited to Compare AccelOps' Integrated Monitoring Depth, Breadth and Value

SANTA CLARA, CALIF. – November 17, 2010 – [AccelOps](#) today announced that enterprises and service providers can immediately download AccelOps' integrated data center and cloud monitoring solution for a free, 14-day evaluation. The AccelOps platform provides a single pane of glass that cuts through operational silos, infrastructure and technologies for end-to-end visibility across on-premise, off-premise and cloud environments.

AccelOps monitors performance, availability, security, virtualization, identity, change and business service management for proactive alerting, rapid root-cause analysis and automated reporting.

As a fully integrated solution, AccelOps overcomes the costs, blindspots and limitations of disparate IT tools and legacy, element-oriented management systems.

"We welcome organizations to try AccelOps and experience our monitoring platform's depth, breadth and value first-hand," said [Imin Lee](#), CEO of AccelOps. "AccelOps delivers the level of operational intelligence, automation and value required by enterprises and service providers to meet SLA commitments, reduce costs and gain cloud computing advantages."

Organizations are invited to register and download AccelOps' 14-day trial version by visiting <http://www.accelops.net/eval-download>.

Key Features

AccelOps yields 360-degree intelligence with regards to performance and availability monitoring, Security Information Event Management (SIEM) or both as an "all-in-one" platform to support network and security operations convergence. Delivered as a virtual

appliance or software as a service (SaaS), AccelOps raises the bar for ease of use, rapid deployment, simple administration, IT staff collaboration and return on investment.

[Prominent features in AccelOps](#) include:

- Out-of-the box knowledge base
- Dynamic, unified Web console
- Discovery and agent-less integration
- CMDB and configuration monitoring
- Network performance monitoring
- Multi-layer virtualization monitoring
- Application monitoring with synthetic transactions; such as email, database and VOIP
- Security Information Event Management
- Business service management
- Smart incident management with ticketing
- Topology mapping
- Resource usage and metering
- Multi-tenancy
- Scalable dynamic clustering
- Virtual appliance or SaaS delivery

About AccelOps - Intelligent. Proactive. Secure.

AccelOps integrated data center and cloud monitoring solutions bring unparalleled operational intelligence, service insight, efficiency and security to enterprises and service providers. Delivered as a scalable virtual appliance or SaaS, the AccelOps platform cross-correlates and manages diverse operational data on-premise, off-premise and in cloud environments to provide proactive performance, availability, security, change and business service management. AccelOps enables service delivery with end-to-end visibility, efficient root-cause analysis, reduced MTTR and compliance automation. AccelOps, with offices in Silicon Valley, London and Shanghai, markets their solution direct and through a network of authorized partners.
