## **ACCELOPS SUCCESSFULLY COMPLETES MSPALLIANCE VENDOR ACCREDITATION PROGRAM**

**SANTA CLARA, CALIF. – October 6, 2010 – [AccelOps](#)**, the integrated data center and cloud service monitoring leader, today announced that the company has been re-accredited under the [MSPAlliance](#) (MSPA) Vendor Accreditation Program (VAP). VAP is the first program of its kind, specifically designed by Managed Service Providers (MSPs) as a benchmark for vendors who sell to the MSP community.

Vendors who bear the VAP seal have shown they abide by the highest principles of quality in areas such as financial stability, positive channel practices, product research and development, and MSP customer satisfaction.

"The Vendor Accreditation Program is important to MSPs, since companies that receive accreditation have demonstrated their ongoing commitment to the channel," said Charles Weaver, president of the MSPAlliance. "We are pleased to have AccelOps achieve re-accreditation and extend their membership within this prestigious vendor community."

AccelOps provides an intelligent and cost-effective means for MSPs, Application Service Providers (ASPs) and hosting providers to meet service levels, increase efficiency and capitalize on new service delivery opportunities. AccelOps Service Provider edition offers an integrated approach to data center and cloud service monitoring that replaces disparate IT tools, open-source utilities and legacy management systems with a scalable platform that monitors performance, availability, security, change and business service management. The solution offers a single pane of glass into the extended data center, spanning on-premise, off-premise, hybrid cloud and hosted application environments.

"The MSPAlliance provides tremendous benefit to the MSP community and facilitates the means for peer and vendor collaboration on trends, issues, capabilities and technologies," said [Imin Lee](#), CEO of AccelOps. "We look forward to participating in the Alliance and supporting the MSP industry."

Delivered as a virtual appliance cluster or Software-as-a-Service (SaaS), AccelOps raises the bar for ease of use, rapid deployment, simple administration and return on investment. Learn more at: [www.accelops.net/sp.php](http://www.accelops.net/sp.php).

### **About AccelOps - Intelligent. Proactive. Secure.**

AccelOps integrated data center and cloud service monitoring solutions bring unparalleled operational intelligence, service insight, efficiency and security to enterprises and service providers. Delivered as a scalable virtual appliance or SaaS, the AccelOps platform cross-correlates and manages diverse operational data on-premise, off-premise and in cloud environments to provide proactive performance, availability, security, change and business service management. AccelOps enables service delivery with end-to-end visibility, efficient root-cause analysis, reduced MTTR and compliance automation. AccelOps, with offices in Silicon Valley, London and Shanghai, markets their solution direct and through a network of authorized partners. See our breadth, depth and value by visiting <http://www.AccelOps.net>.

### **About MSP Alliance**

The MSPAlliance is a professional association of 8,000 managed service providers and service-enabling technology vendors, who work in a collaborative effort to define, promote and educate the Managed Services Industry and the end-user consumer on the adoption and successful use of technology through Managed Services. MSPAlliance member companies are able to achieve Green IT Certifications, Disaster Recovery Certifications, and ultimately achieve MSPAlliance Accredited Provider Status. The MSPAlliance also offers many member benefits, such as insurance, leasing programs, educational workshops and an online Managed Services Institute. For more information about the MSPAlliance please visit <http://www.mspalliance.com>.
