ACCELOPS TO UNVEIL CLOUD-FOCUSED GO-TO-MARKET PACKAGING OF PRODUCT CAPABILITIES AT INTEROP

SANTA CLARA, CALIF. – April 20, 2011 – AccelOps, Inc., the only provider of integrated monitoring solutions built from the ground up for cloud-generation data centers, will unveil at [Interop Las Vegas 2011](#) new go-to-market packaging of its product capabilities designed to make it easier for enterprises and service providers to deliver IT as a service. In particular, the new packaging will focus on enabling elastic monitoring and unlimited scaling, as well as facilitate service providers' efforts to bring managed service offerings to market.

The AccelOps booth #515 will be located in Interop's Cloud and Virtualization Zone. Also featured in the AccelOps booth will be product demonstrations of the solution's elastic monitoring capabilities, including support for mid- to large enterprises deploying private / hybrid clouds, hosters / cloud operators providing cloud-based services, and managed service providers delivering cloud-based remote monitoring.

About AccelOps

The AccelOps integrated monitoring platform enables cloud-generation data centers to deliver on the promise of IT as a service. Offered as an easy-to-deploy virtual appliance or Software-as-a-Service (SaaS), the AccelOps solution cross-correlates diverse operational data on-premise, off-premise, and in cloud environments, proactively monitoring from end-to-end an entire network environment. Monitoring capabilities include performance and availability, SIEM and identity, compliance automation, virtualization, CMDB / change, and business service management. The solution's multi-tenancy, metering, elastic monitoring, and unlimited scalability are purpose-built for mid- to large enterprise and service provider deployments, delivering the visibility, control, and operational efficiencies necessary in today's complex and dynamic IT services environment. For more information, visit www.accelops.net or download a product trial at www.accelops.net/eval-download.
